

ATE Connecting

To connect a motherboard and a daughterboard in an automatic testing equipment, pogo towers and adapters are usually used. C.C.P. has developed ATE connecting solution for several years. Testing equipment such as J750 and V93000 are well-established solutions.

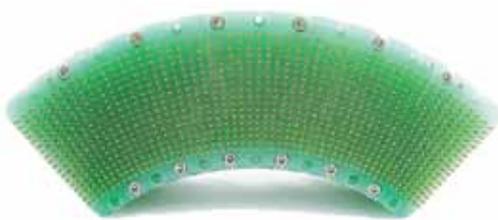

Design Concept

We are capable to customize for customer to meet the requirement of high frequency signal transaction or mechanism space.

Pogo tower (line)

Pogo tower (line)	Specification
Housing Material	FR4
Pitch	2.54
Insertion Loss	-3dB@2.4GHz

Pogo tower (ring)

Pogo tower (ring)	Specification
Housing Material	FR4
Pitch	2.54
Insertion Loss	-3dB@2.4GHz

Pogo cable

Pogo cable	Specification
Housing Material	FR4
Pitch	2.54
Insertion Loss	-3dB@2.4GHz
Impedance	50Ω
